# Supplemental Reporting Submission Overview

---

The Department of Planning and Budget (DPB) is responsible for gathering and processing agency submissions of “supplemental reporting” – information providing data on federal grants, organizational memberships, and out-year costs. For that purpose, this notice issues guidance to state agencies on preparing the submissions to be reviewed by DPB and subsequently shared with the Governor’s office and the General Assembly.

## What reporting information is involved?

- **Federal grants.** If applicable, agencies are to provide a listing and general description of any federal contract, grant, or money in excess of \$1.0 million for which the agency was eligible, whether or not the agency applied for, accepted, and received such contract, grant, or money, and, if not, the reasons for why it did not apply. Responses should be based on the current fiscal year.
- **Organizational Memberships.** If applicable, agencies are to report on organizational memberships with annual dues of \$5,000 or more. Responses should reflect what is budgeted (both GF and NGF) in FY 2019. (Section 4-5.05 c.2 identifies this requirement and exempts institutions of higher education.)
- **Out Year Costs.** If applicable, agencies are to identify any anticipated out-year spending increases or decreases that were not submitted as part of a decision package. For example, a new building or facility will be coming on line in September 2021 for which operating costs are anticipated. Since additional funding for this new facility is not required in the 2018-2020 biennium, no decision package would be submitted. The Out Year Costs tab of the Supplemental Reporting module is where such costs should be identified.

## Where do I report this information?

All submissions will be made using DPB’s Performance Budgeting (PB) system. The Supplemental Reporting module can be found in the drop-down list of the OPERATING BUDGET index tab on the PB system’s Work Tray. A detailed user guide on how to prepare the submission is contained within the HELP feature available in the Supplemental Reporting module (also provided in Attachment A below).

## When is the submission due?

PB system submissions are to be completed by **Monday, November 12, 2018**. If none of the three reporting requirements are applicable to your agency, please let your DPB budget analyst know.

Please contact your DPB budget analyst if you have any questions.

## Instructions - Performance Budgeting System

*Note: The following information is an extract from the PB system HELP feature in the Supplemental Reporting module. If after reading these detail instructions you have any questions of a policy nature, please contact your DPB budget analyst. **With exception to institutions of higher education for organizational memberships, each state agency (all branches of government) is required to report on the following information annually:**

- **Federal grants.** Listing and general description of any federal contract, grant, or money in excess of \$1.0 million for which the agency was eligible, whether or not the agency applied for, accepted, and received such contract, grant, or money, and, if not, the reasons for which it did not apply. This should be based according to the state fiscal year.
- **Organizational Memberships.** In addition, the Appropriation Act requires all agencies to report on organizational memberships with annual dues of \$5,000 or more. (Section 4-5.05 exempts institutions of higher education.)
- **Out Year Costs.** Agencies may anticipate out-year spending increases or decreases that may not be submitted as part of a decision package. For example, a new building or facility may be coming on line in September 2021 for which operating costs are anticipated. Since additional funding for this new facility is not required in the current biennium, no decision package would be submitted. To capture any anticipated appropriation needs for the future biennia for which your agency is not submitting a decision package, you must complete an Out-Year Cost Estimates.
